DESCRIPTORS	Admission Criteria; *Career Opportunities; *Directories; Educational Opportunities; Educational Programs; Financial Support; *Health Occupations; *Health Occupations Education; Occupational Guidance; *Occupational Information; Paramedical Occupations; Post Secondary Education; Program Costs; Resource Guides; Vocational Counseling; Vocational Interests
IDENTIFIERS	*Kentucky

ABSTRACT

Intended to provide information on career opportunities in health occupations for guidance counselors, teachers, and students, this tabbed directory lists occupational information alphabetically by job title for a wide range of health careers. Kentucky Educational requirements, licensure or registration requirements, and resource addresses precede extensive data on admissions, program costs, and student financial aid for post-secondary institutions offering courses leading to these health careers. Presented in a 3-ring notebook for ease in insertion and removal of pages, this resource guide includes a list of vocational interests correlated to health careers, a resource list, and a description of financial assistance available for those pursuing health careers. This document was developed by a Kentucky hospital research foundation in cooperation with allied health and public organizations in the state for the purpose of increasing manpower in health services delivery. Announcing...

Health Careers In Kentucky is a program of the Kentucky Hospital Research and Education Foundation, Inc., which was organized by the Kentucky Hospital Association. This is a cooperative effort being made with the majority of the allied health and public organizations of Kentucky. It is designed to improve the health care of Kentuckians by increasing the manpower which delivers health care.

The Health Careers In Kentucky Guide was one of the first products of the program. The 1971 edition describes the health careers taught in Kentucky. Throughout the coming year you, the guidance counselor, will be receiving other information regarding health careers. Information on health careers may be obtained from the Health Careers In Kentucky office.

We invite you to participate in this program through advice and critique of those things which we present to you. Hopefully, students will also come to us seeking information.

It is the sincere hope of the Kentucky Hospital Research and Education Foundation that the people, young and old, of Kentucky will avail themselves of the services of Health Careers In Kentucky.

Paul W. Ahlstedt
Paul W. Ahlstedt, President
Kentucky Hospital Association

Health Careers Executive Committee

COMMONWEALTH OF KENTUCKY
DEPARTMENT OF EDUCATION
FRANKFORT, KY. 40601

WENDELL P. BUTLER
SUPERINTENDENT OF PUBLIC INSTRUCTION

September 16, 1968

TO: All persons interested in the proper guidance of Kentucky's young people.

Kentucky is proud not only of its youth and educational system, but also of those groups which voluntarily step forward to assist in the advancement of both. This Health Careers in Kentucky Guide is the product of such a group. Recent studies have shown that health education facilities in Kentucky are training young people in over thirty-five health careers, but statistics also show a shortage of greater than three thousand people in health care occupations.

We see the creation of new health specialities yearly. These new careers are almost impossible for the individual to keep up with. This Guide is an excellent effort to provide the student and the guidance counselor with current information on health training programs. Even more excellent is the concept of creating a central source of information on health occupations. Health Careers in Kentucky has become that source and throughout the coming year guidance counselors, students, and health educators will reap the rewards of this new program.

More than just this Guide will be forthcoming. Workshops, visual aids, literature, speakers' bureaus and other projects are being readied for use during the coming year. It has been a pleasure for the Department of Education to work with the staff of Health Careers in Kentucky, and I most sincerely hope that each of you will take advantage of this excellent opportunity to guide our young people to a more worthwhile life.

Sincerely yours,

Wendell P. Butler

Wendell P. Butler
Superintendent of Public Instruction

SCHOOL INTERESTS AND SOME RELATED HEALTH CAREERS

The purpose of this list is to show how school interests (regular subjects and a few that are sometimes considered extra-curricular activities) are related to specific health careers. In order to suggest career opportunities that might not otherwise occur to you, examples have been selected mainly from among less familiar health occupations representing a cross-section of educational levels. Those listed are, of course, only a small sample; the same kind of matching can be applied across the board to practically all health careers.

SCHOOL INTERESTS	RELATED HEALTH CAREERS
Art	Medical Artist and Illustrator Poster and Display Artist Occupational Therapist
Business and Finance	Administrator and Administrative Assistant Controller, Accountant, etc.
Clerical Skills	Business Office Worker Medical Records Librarian Medical Secretary Ward Clerk
Electronics	Computer Programmer Computer Operator Electronics Technician Medical Engineer
English and Journalism	Health Educator Librarian (Hospital and Medical) Public Information Specialist Public Relations Officer Science Writer Technical Writer
Foreign Language	Medical Librarian Translator (of medical and scientific publications)
Home Economics	Dietitian Executive Housekeeper Food Service Worker Homemaking Rehabilitation Consultant Nutritionist

SCHOOL INTERESTS	RELATED HEALTH CAREERS
Industrial Arts (wood, metal, electric, etc.)	Hospital Engineer Instrument Maker Maintenance Worker Manual Arts Therapist Medical Engineering Technician Prosthetic Appliance Maker
Mathematics	Biomedical Research Scientist Computer Programmer Health Statistician Statistical Clerk
Modelmaking	Exhibits Builder Scientific Model Technician
Music	Music Therapist
Photography	Photographer (research or public information)
Physical Education	Corrective Therapist Physical Therapist Recreation Therapist School Health Educator
Social Studies	Health Economist Health Sociologist Psychologist Public Health Educator Public Health Program Assistant Social Worker
Science	Biologist, Chemist, Physicist, Mathematician, and Engineer in: Basic Research, Environmental Health (including Sanitary Engineer, Sanitarian, Industrial Hygienist, Radiological Health Specialist, etc.) Food and Drug Protection Medical Engineering

Reproduced from Health Careers Guidebook published by U.S. Department of Labor, 1965.

FINANCIAL ASSISTANCE FOR HEALTH CAREERS

It is difficult to enumerate all the financial assistance resources for health careers education. Through the following material, it is hoped that you may be informed of some of the *sources* of information on financing health careers. We would like to extend our thanks to the Health Careers Council of Illinois for its assistance in preparing this information. Basically, there are three types of sources of scholarships and loans for health careers.

1. *National sources* for general financial assistance are frequently overlooked because they are not specifically labeled for health education, yet they constitute an enormous reservoir of help. We will mention a few.

   The Veterans Readjustment Benefits Act of 1966 (Cold War GI Bill) provides educational opportunities for qualified servicemen and women now in civilian life, or on active duty in the armed forces. Contact your Veterans Administration office.

   The Junior GI Bill (Title 38 U.S. Code, Chap. 35) provides education opportunities for children of veterans who died or were permanently and totally disabled as a result of serving in the U.S. Armed Forces during the Spanish-American War, World War I or II, and the Korean War. Parent or guardian should contact Veterans Administration office.

   Social Security benefits are extended to children whose wage-earning parent is dead, totally disabled, or over 62 and unemployed, while attending high school or college *after reaching* age 18 and up to age 22. Contact your local social security office.

   Other national programs include: the *College Work-Study Program*, a program of employment in which the student, particularly from a low-income family, is compensated or the number of hours he works for the institution or for an eligible off-campus agency; the *National Defense Student Loan Program*, a program of *borrowing*, primarily for needy students, in which the student has an obligation to repay his loan, with 3% interest within a 10-year period following college attendance; the *Educational Opportunity Act of 1964*, a program of direct *grants* in which the student receives a non-obligating award of funds, based on exceptional financial need and evidence of academic or creative promise; and the *Guaranteed Loans Program*, a program of *borrowing*, primarily for students from middle- or upper-income families-- the student has an obligation to repay his loan with 3% (middle income) or 6% (upper income) interest. Contact Kentucky Higher Education Assistance Authority, 319 Ann Street, Frankfort, Kentucky 40601, or United Student Aid Funds, 5259 North Tacoma Avenue, Indianapolis, Indiana 46220.

The Health Professions Student Loan Program is a program of *borrowing*, specifically for students pursuing a degree of doctor of medicine, or dentistry or equivalent, or osteopathy, or optometry or equivalent, or podiatry, or pharmacy, or surgical chiropody, or a bachelor of science in pharmacy. Loans bear a 3% interest rate and are repayable over a 10-year period which begins 3 years after completion or termination of study. Part of the loan may be cancelled for practicing in an area determined by State health authorities. (This type of loan makes you ineligible for a NDEA loan.) The *Nursing Student Loan Program* is a program of *borrowing* also, with interest ranging from 3% to 4 1/2%. Fifty per cent of the total loan can be cancelled if you work as a nurse for the first five years after receiving your R.N. Both these programs are administered through the schools offering the education, but not all schools participate, so confirm this with the school(s) of your choice.

The *National Merit Scholarship Program*, an *award* program based on need and academic promise, is also often used as a guide for private industry and foundation scholarships, therefore, it is often a good policy to take their test even if the odds are that you won't win a National Merit Scholarship. Your ranking can still establish you as a person of real promise.

The *Manpower Development Training Act* provides schooling and stipends for students enrolled in a number of health occupations training programs. The *Health Professions Scholarship Grant* provides a maximum of $2,500 per student to exceptionally needy (those who could not pursue full time studies without this financial assistance).

The *Armed Forces and the U.S. Public Health Service* have liberal financial assistance programs available in exchange for normal enlistments, which are delayed 12 to 24 months while your education is completed. Under certain conditions and for given schools, financial assistance may be provided for a longer period than 24 months.

National professional associations, voluntary health agencies and many national foundations, businesses and industries provide financial assistance for further education. Do not overlook company scholarships that may be available to you through your parents' places of employment.

2. *State sources* include scholarship and loan programs for which the state appropriates funds. State departments of education and school counselors maintain lists of these programs. State professional associations and state foundations, businesses and industries are also good sources. Voluntary health organizations (heart, cancer, tuberculosis, etc.), health improvement associations, and hospital and health professional association auxiliaries usually offer

scholarship aid for health careers education as one of their major activities.

Local sources are many and varied. Your school counselor, health careers chairmen of the county medical society, dental society, hospital, pharmaceutical and other auxiliaries are the best sources for information.

The Kentucky Medical Association, 3532 Ephraim McDowell Drive, Louisville, Kentucky 40205, offers a substantial "Rural Kentucky Medical Scholarship' for students who agree to practice in a rural area of Kentucky. *Kentucky Dental Association*, 1940 Princeton Drive, Louisville, Kentucky 40205, has a similar scholarship for dentistry students.

The best sources for information on financial assistance are the *schools* for the health occupations and professions. Both specific and general sources of financial assistance are available through the school of your choice. Discuss your needs with the school's student financial advisor or student counselor.

Before applying you should be reasonably certain that you will meet the entrance requirements for education in the health career of your choice. Applying for financial assistance with a particular school usually means that you have at least received provisional acceptance for enrollment.

EXPLORE EARLY. Juniors in high school can profit from early investigation of possible scholarships. Timing is important. Knowing when and how to apply is as important as identifying sources. Learn when agencies you are seeking help from will accept applications-- and then get your *complete* application on file early in that period.

Your general application letter should be brief, but should state fully and unequivocally your needs, career goals, and all present resources for partially financing your education. Your school counselor, school advisor, bank officer, or members of the health professions will be happy to assist you.

Lastly, take your Scholastic Aptitude Test (SAT) and American College Test (ACT) in your junior year; this gives you a second chance in your senior year for raising you scores. The *highest* score you obtain is sent to the institutions you specify, and scores are often required as part of scholarship and grant applications.

MEDICAL ASSISTANT

THE CAREER

ADMINISTRATIVE - Administrative Medical Assistants are trained in the basic secretarial skills which include the use of the typewriter, transcribing equipment, office duplicating machines plus working with the accounting aspect of medical office practice. Receptionist, insurance "expert", accountant, housekeeper, and secretary all describe the functions of the Administrative Medical Assistant. Medical Secretaries may also fit into this career title.

CLINICAL - Clinical Medical Assistants function primarily in the physician's office as an assistant to him in patient examinations and other clinical tasks. While being trained with secretarial skills, the Clinical Medical Assistant also receives training to enable her to perform simple office laboratory procedures as well as prepare and care for the medical instruments and equipment. Although she is not a nurse or medical technologist, she is trained to carry on some of the most simple functions of these two professions.

EDUCATION

Recommended education for Administrative Medical Assistants is two years of college on the Associate of Arts level or a twelve to eighteen month course in a business college.

Recommended education for Clinical Medical Assistants is two years of study for an Associate degree in the community college system.

LICENSURE OR REGISTRATION

While licensure is not required for the Administrative or Clinical Medical Assistant, it is becoming more and more looked upon as a measure of ability. Both may demonstrate their professional competence by passing the certification examination given annually by the American Association of Medical Assistants.

CERTIFIED LABORATORY ASSISTANT (CLA)

THE CAREER

Certified Laboratory Assistants perform the more simple and routine examinations which take place in the laboratory. They are under the direct supervision of the medical technologist and pathologist working in bacteriology, blood banking, hematology, parasitology, serology, and urinalysis. Specifically, they collect blood specimens, prepare slides, analyze blood and body fluids for chemical components, take electrocardiograms, basal metabolism tests and other similar tasks.

EDUCATION

In Kentucky, there are two educational paths a prospective Certified Laboratory Assistant may follow. These two paths are:

1. Associate of Arts Degree from the Community College system in two years study
2. Twelve (12) months study in an approved hospital course leading to a certificate

LICENSURE OR REGISTRATION

To become an official Certified Laboratory Assistant and use the initials CLA after their name, the student must successfully pass the examination given by the Board of Certified Laboratory Assistants after they have graduated from an approved school of laboratory assistants.

COMMUNITY HEALTH (PUBLIC HEALTH)

THE CAREER Community Health as a title actually encompasses a large range of more specific titles and duties such as administration, sanitation, pollution control, education, and many others. Community Health concentrates on the "stay well" function of all health professions, emphasizes a "team approach" to solving health problems. Career opportunities in this field are numerous and expanding very rapidly.

EDUCATION Preparation for Community Health careers varies as the particularly chosen specialty requires. In Kentucky, a general Community Health B.S. degree may be obtained in four years preparing the student for numerous roles in both official and voluntary agencies as well as in many comprehensive medical care programs. An additional year leads to a M.S.P.H. preparing the student for teaching or supervisory roles in community health.

LICENSURE OR REGISTRATION None

COMMUNITY MEDICINE ASSISTANT

THE CAREER Community Medicine Assistants serve as assistants to professionals in the health office. They are able to conduct certain screening programs and perform simple laboratory procedures. They are also trained to have a basic understanding of environmental sanitation in the community. They conduct epidemiologic studies under professional supervision. With a strong emphasis on prevention, they assist in health education programs. They may be employed by a group of physicians providing similar services for them as an extension of their offices into the communities and families from which their patients come.

EDUCATION Educational requirements for a profession as a Community Medicine Assistant are two years of study at the Community College level obtaining an Associate Degree.

LICENSURE OR REGISTRATION None

CYTOTECHNOLOGY CT (ASCP)

THE CAREER

Cytotechnologists are trained in special laboratory techniques and procedures for detecting body cell changes which are particularly important in the early diagnosis of cancer. Working under the direct supervision of the pathologist, cytotechnologists screen slides of cell samplings under the microscope tracing clues to disease in the patterns of cytoplasms and nuclei stained with special dyes to make them stand out brightly. Basically, the Cytotechnologist is a specialist among the medical laboratory technologists.

EDUCATION

Educational requirements for a Cytotechnologist include a minimum of two years of college with 12 semester hours in biology followed by 6 months in an AMA approved school of cytotechnology plus 6 months supervising experience in an acceptable cytotechnology laboratory.

LICENSURE OR REGISTRATION

To practice professionally as a cytotechnologist, and use the initials CT (ASCP), the student must pass the examination of the Registry of Medical Technologists upon completion of the educational requirements.

DENTAL ASSISTANT

THE CAREER Dental Assistants are the "girl Fridays" of the practicing dentist. Their functions are mixed between secretarial and technical tasks. Dental Assistants may greet the patient and prepare them for examination, treatment, or surgery. They may also prepare solutions, mix fillings and cement, and assist the dentist in taking and processing X-Rays. Maintaining the patient's medical and business records are also an important function of this career.

EDUCATION In Kentucky at the present time, Dental Assistants are trained in a twenty-seven week course offered by the Department of Vocational Education and funded by the Manpower Development Training Act (MDTA).

LICENSURE OR REGISTRATION Although registration is not necessary to practice as a Dental Assistant, graduates of approved schools may take a certification examination after fulfilling an experience requirement. This examination is given by the American Dental Assistants Association.

DENTAL HYGIENE

THE CAREER

Dental Hygienists are specialists in the non-medical aspects of dental mouth care. A major part of this work is dental prophylaxis; the scaling and polishing of teeth. Educating patients in regard to individual dental needs, including methods and aids for toothbrushing and gum care is an important function of the Dental Hygienist. Advising and assisting the dentist in treatments places the Dental Hygienists in a responsible position on the dental team. Young people entering into this career may find opportunities for employment not only in the private dentist's office but also in school systems and health departments.

EDUCATION

Two programs are offered in the curriculum in Dental Hygiene, a two year program leading to the certificate in Dental Hygiene and a four year program leading to a Bachelor of Science--Dental Hygiene degree (first year in College of Arts & Sciences, second and third year, curriculum in Dental Hygiene, fourth year, College of Arts & Sciences). Specific curriculum structure may vary from school to school.

LICENSURE OR REGISTRATION

The State Board of Dental Examiners administers a licensing examination, which the student must pass successfully in order to practice Dental Hygiene.

DENTAL LABORATORY TECHNOLOGY (C.D.T.)

THE CAREER Dental Laboratory Technicians are the skilled craftsmen of the dental world. There are five basic areas of Dental Laboratory Technology; complete and partial denture construction, crown and fixed bridgework fabrication, gold or other precious metal cast partials, individual porcelain and acrylic restorations, and orthodontic appliances. Technicians make crowns and bridges as well as arrange artificial teeth on dental appliances. A range from processing plastics to making castings of gold encompasses the work skills of this skilled technician. Dental Laboratory Technicians work not only for practicing dentists but also for private laboratories.

EDUCATION Formal training for this career was primarily on the job training, but now it is recommended that the student receive an Associate of Arts college degree.

LICENSURE OR REGISTRATION Graduates of approved schools of Dental Laboratory Technology may take the certification examination given by the National Board for Certification of Dental Technicians and be eligible to use the initials C.D.T. after their name.

DENTISTRY (D.D.S.), (D.M.D.)

THE CAREER

Dentists must thoroughly understand the life cycle of the mouth and its tissues and be able to alter scientifically their structure and functions to maintain health. Restoration of the mouth as well as tooth extraction is a part of their practice. Dentists may write prescriptions, advise on diet, and diagnose and treat oral infections and disorders. They combine the professions of biologist, pathologist and surgeon into one as well as practice prevention of mouth disorders.

EDUCATION

Pre-Dental education requires a minimum of two years of college including biology, physics, and inorganic and organic chemistry; four years, however, is the recommended study length. Professional dental education lasts for four years; after successful completion of which the student is eligible for a degree. Specialization in dentistry, like medicine, requires additional years of study.

LICENSURE OR REGISTRATION

Upon receipt of a dental degree the graduate must pass the Kentucky State Board of Dental Examiners examination for licensure to practice Dentistry.

DIETETICS (ADA)

THE CAREER — In Kentucky, there are three distinct careers in Dietetics from which the student might choose:

Food Service Technology — This program prepares men and women for positions in food service establishments. Graduates serve as middle management or supervisors in not only hospital operations, but also school food services. Responsibilities may include planning, preparing, and serving meals. Food service technicians work directly under a dietician or nutritionist.

Dietician — The basic career in Dietetics is that of a dietician. Even this basic career has several specialities such as administrative dietician, teaching dietician, research dietician, and therapeutic dietician. This person is a specialist in the science of foods and nutritional requirements of human beings. They may work in planning and supervision of food for patients as well as give instructions on diets to patients.

Clinical Nutritionist or Nutritionist — A specialized dietician with additional education concerned with diet therapy, guiding and teaching patients who may or may not be hospitalized. Also the clinical nutritionist may teach other health professionals.

EDUCATION — Food Service Technicians require an Associate of Arts Degree. Dieticians are required to obtain a B.S. Degree in Home Economics and then serve a one year internship in an American Dietetic Association approved situation which may be an approved hospital or a Master's Degree course. Clinical Nutritionists must receive the four year B.S. Home Economics Degree and then take a two years Master's Degree course.

LICENSURE OR REGISTRATION — Dieticians and clinical nutritionists may become members of the American Dietetic Association upon completing the education requirements and use the initials A.D.A.

DIETETIC INTERNSHIP

THE CAREER Interns rotate on the various services in the therapeutic area and in the food service administration area of the hospital. Basic learning experiences are provided in order that the intern may learn to function as a dietitian. Each intern will have projects and assignments to complete on each service.

EDUCATION Must have B.S. Degree in Dietetics and Nutrition or related field from an accredited college or university. During the internship classwork will be given (125 hours). This may be for graduate credit at the University of Kentucky.

LICENSURE OR REGISTRATION Member of the American Dietetic Association and can become a registered dietician by completion of a test.

DOCTOR OF MEDICINE (M.D.)

THE CAREER

Doctors of Medicine or physicians are the backbone and nerve center of all health careers. Physicians diagnose and treat disease. Primarily the physician is a private practioner working independently or with one or more professional colleagues. Prescription writing, history taking, interpretation of diagnostic procedures are all a part of the daily tasks of a physician. There are thirty-five specialities and sub-specialities which a physician may choose after his graduation from medical school. Research, public health, teaching and many other opportunities are available to the holder of the M.D. degree.

EDUCATION

Four years of college with a bachelor's degree is the basic requirement for pre-medical school education. Students then take the Medical College Admission Test. Four years of professional training in an approved medical school leads to the M.D. degree. Following medical school, the student now serves a twelve or twenty-four month internship. For specialty practice, a residency training of two to five more years may be involved.

LICENSURE OR REGISTRATION

After completing his internship and/or residency training, the physician must obtain a state license before he can enter practice.

ELECTROENCEPHALOGRAPHY TECHNICIAN (EEG)

THE CAREER

Electroencephalography Technicians assist the physician in obtaining information about the brain function in people through testing. Working with complex equipment such as electronic amplifiers, the EEG Technician tests conditions from minor headaches to serious brain disease. Besides operating the equipment the technician organizes the laboratory program, acts as a coordinator with other people and labs, and assists in the preparing of records. Ingenuity and honesty are two virtues this person must possess in order to obtain the necessary diagnostic information for the physician. Research laboratories may utilize this person in additional neurological diagnostic tests or work.

EDUCATION

This new career has as an education requirement, an Associate of Arts degree.

LICENSURE OR REGISTRATION

Graduates may take the American Board of Registration of Electroencephalography Technologists examination to demonstrate their professional proficiency.

MEDICAL RECORD TECHNICIAN (ART)

THE CAREER

Medical Record Technicians assist the Medical Record Librarian in technical work such as assembling medical records, preparing reports, and setting up disease indexes. Supervision of day to day operation may also be a part of the technician's work. Since medical records are contributed to by the entire health force the record technician deals with different people on a daily basis.

EDUCATION

A two year Associate of Arts degree in Medical Record Technology is now recommended. This course will include anatomy, medical terminology, statistics and other related courses.

LICENSURE OR REGISTRATION

Graduates of approved schools are eligible to take the American Association of Medical Record Librarians national accreditation examination. Upon successful completion candidates may add the initials ART (Accredited Record Technician) to their name.

MEDICAL TECHNOLOGIST MT (ASCP)

THE CAREER Medical Technologists perform scientific, fact-finding tests in the clinical laboratory that help track down the cause and cure of disease. This career combines a knowledge of science plus working with patients. One of the most needed members of the health team the medical technologist chemically analyzes body fluids, performs blood counts, and conducts many of the tests necessary to properly diagnose illness. With the increasing use of complex analytical equipment medical technologists are even more in demand than before.

EDUCATION Medical Technologists follow a strict training program requiring three years of college training and one year of training in a hospital based Medical Technology school. Upon completion of studies they receive a B.S. degree and a medical technology certificate.

LICENSURE OR REGISTRATION Graduates of approved schools may take the semiannual national certification examination given by the Board of Registry of Medical Technologists of the American Society of Clinical Pathology (ASCP). Passing the examination entitles a person to the initials MT (ASCP).

MENTAL HEALTH ASSISTANT

THE CAREER

Mental Health Assistants under the supervision of professional personnel, assist other mental health workers in the care of patients in a variety of treatment situations. They assist in group therapy, observe patient progress and patient interrelationships. They make home visits to observe the patient in the family and community and to see if prescribed medicine is being taken. The Mental Health Assistant is part of the team responsible for creating an environment conductive to the proper treatment and rehabilitation of the mantally ill patient. He may work with the family of the patient as directed by his supervisor.

EDUCATION

Mental Health Assistants should possess the two year associate arts degree in this field.

LICENSURE OR REGISTRATION

MIDWIFERY

THE CAREER Midwifery is described in medical dictionaries: "The art of assisting at childbirth." This unusual career is most prevalent in areas where there is a shortage of physicians. It is an important health service provided in lieu of adequate numbers of physicians to give care to women during pregnancy.

EDUCATION To enter Midwifery, the student must be a graduate of a professional school of nursing, currently registered in the United States and have a minimum of one year post-graduate experience in nursing. Education for this career is twenty-six weeks, followed by twelve weeks internship. A diploma is received by successful graduates.

LICENSURE OR REGISTRATION Upon completion of the curriculum, graduates are licensed to practice Midwifery in Kentucky.

FURTHER INFORMATION MAY BE OBTAINED FROM

Health Careers In Kentucky
1415 St. Anthony Place
Louisville, Kentucky 40204

Name: Frontier School of Midwifery & Family Nursing
Curriculum: Midwifery & Family Nursing
Address: Hyden, Kentucky 41749

NURSE ANESTHETIST (CRNA)

THE CAREER Nurse Anesthetists are essential members of the hospital operating room team in the administering of anesthetics to patients. Anesthesia is a special type of nursing, combining the gentle attentions and psychology of superior bedside nursing with the arts of technical nursing and the knowledge of advanced science. Nurse anesthetists must handle the complex equipment and agents involved in providing safety and comfort for the patient and optimum operating conditions for the surgeon.

EDUCATION Students for schools of anesthesia for nurses must be graduates of an approved professional school of nursing, hold a current license to practice nursing, and should have a minimum of one year post-graduate work experience. The course itself lasts at least eighteen months in an approved anesthesia school.

LICENSURE OR REGISTRATION Professional proficiency is demonstrated by passing the national examination of the American Association of Nurse Anesthetists. Upon successful completion of the examination they may use the initials CRNA (Certified Registered Nurse Anesthetist). They must then register with the state in which they practice.

NURSE - LICENSED PRACTICAL (LPN)

THE CAREER

Practical Nurses are part of an expanding field attracting men as well as women. LPN's give bedside nursing care to patients who are not acutely ill, and assist the professional nurse with patients who are more seriously ill. All areas of health care feel the presence of the LPN and she or he is a vital link in the nursing services rendered today. Generally the LPN is under the direct supervision of a registered professional nurse.

EDUCATION

Approved one year educational programs after graduation from high school, qualifies the student to take the state licensure examinations.

LICENSURE OR REGISTRATION

To become a legally qualified Licensed Practical Nurse, the graduate must pass the state licensure examination given by the State Board of Nursing Education and Nurse Registration.

NURSE - PROFESSIONAL (RN)

THE CAREER Professional or Registered Nurses begin their career as a general duty nurse in a hospital or physician's office. Acting under the direction of a physician, the general duty nurse plans the patient's nursing care in the hospital. Teaching patients to take part in their own therapy is a responsibility of the nurse. They also supervise practical nurses, aides, and orderlies. Public health is another field that nurses may enter.

EDUCATION There are three basic approaches to becoming a professional nurse. For details, please

turn the page.

LICENSURE OR REGISTRATION To use the initials R.N. and practice nursing, the graduate of an approved school of nursing must pass the examination given by the Kentucky Board of Nursing Education and Nurse Registration.

FURTHER INFORMATION MAY BE OBTAINED FROM

Health Careers In Kentucky

THREE WAYS TO BECOME A REGISTERED NURSE

TYPE OF PROGRAM	HOSPITAL SCHOOL	JUNIOR OR COMMUNITY COLLEGE	COLLEGE OR UNIVERSITY
	In hospital conducting the school of nursing, sometimes in other hospitals on affiliations and in a college or university providing some of the courses.	In the college and in community hospitals and health agencies for clinical laboratory experience.	In a college or university and in hospitals and community health agencies, including public health departments, for clinical laboratory experiences.
LENGTH OF PROGRAM	Usually 126 weeks, but a few are 3 calendar years in length.	Usually range from 2 academic to 2 calendar years in length.	Usually 4 academic years, but some schools require a few summer sessions.
WHAT YOU STUDY	Nursing theory and practice and general education subjects, primarily in the basic sciences, and usually prior to taking nursing courses.	Nursing theory and practice interwoven with general education courses at the junior college level, including arts and sciences.	Nursing theory and practice coordinated with college level courses in general education, including art, sciences, and humanities.
DIPLOMA OR DEGREE EARNED	Diploma in Nursing	Associate in Arts degree	Bachelor of Science in Nursing degree.
WHAT YOU ARE PREPARED TO DO	General duty nursing under supervision in a hospital or similar institution and other beginning positions. 1.	General duty nursing under supervision in a hospital or similar institution and other beginning positions. 1.	General duty nursing under supervision in a hospital or similar institution and all beginning positions; progression to head nurse in some hospitals or to other advanced positions; staff nursing in a public health agency or school nursing if your school's program was approved for public health nursing by NLN. 2.

1. Graduates of diploma and associate degree programs in nursing who seek to study further, to obtain a baccalaureate degree, may be granted credits toward a B.S.N. degree in accordance with the policies of the particular college or university they wish to attend.

2. Graduates also have foundations for continuing professional development, including graduate study in nursing to earn the degree of Master of Science in Nursing. This degree is strongly recommended for those who wish to specialize in teaching or nursing service administration. In addition those earning a M.S.N. degree will also choose a clinical nursing area in which to specialize, e.g., psychiatric, surgical, medical, maternal, pediatric, or geriatric nursing. All specialization in nursing is at the graduate rather than the undergraduate level. Additional specialization may be obtained in doctoral programs and many nurses with doctorates in philosophy, education, and so forth, are needed in teaching and in research.

PASTORAL COUNSELING

THE CAREER

The pastoral counselor, usually in collaboration with other helping persons, provides supportive and healing care for troubled persons desiring the services of a religiously oriented, trained counselor. The pastoral counselor is trained to work with individuals and with groups, including community groups. He may be employed in community mental health centers, hospitals, clinics, or other settings which are usually institutional settings.

EDUCATION

Certified pastoral counselors hold undergraduate baccalaureate degrees, a basic theological degree (e.g., Bachelor of Divinity, Master of Divinity, Doctor of Ministry, et al.), and in cases may hold a graduate degree in theology, counseling, psychology, or related disciplines. Further, he will have received psychotherapy himself and worked with clients under the supervision of a certified pastoral counselor, or other professional counselor such as a psychiatrist, psychologist or social worker.

LICENSURE OR REGISTRATION

Certification in the field is provided by the American Association of Pastoral Counselors.

FURTHER INFORMATION MAY BE OBTAINED FROM

Health Careers In Kentucky

PHARMACY (RPH)

THE CAREER

Pharmacists have perhaps one of the widest selections of work places of any health professional. Hospitals, health departments, retail drug stores, industry, and other areas are actively seeking pharmacists. The profession is basically responsible for the preparation and availability of drugs. From the prescription order issued by a physician or dentist, the pharmacist selects or may combine the appropriate drug substances to fill that order. The pharmacist serves as an advisor to the public about the safe and appropriate use of drugs. Hospital pharmacists work closely with the medical staff, administrator, and nurses consulting on drug problems and hospital purchases as well as instructing nurses, interns and other members of the hospital staff.

EDUCATION

Normally, the first one or two years of a pharmacist's education may be spent in any accredited junior college, college, or university which presents the appropriate pre-pharmacy courses. Upon entrance to a college of pharmacy, an additional three or four years of education (depending upon the pre-pharmacy work) is required for the B.S. in Pharmacy degree. An advanced professional degree program leading to the degree, Doctor of Pharmacy, is available at some schools.

LICENSURE OR REGISTRATION

To practice pharmacy, a graduate of an approved school of pharmacy must successfully pass the licensing examination of the State Board of Pharmacy.

PHYSICAL THERAPIST

THE CAREER

Physical Therapists treat patients (under prescription from a physician) with disabilities resulting from disease, injury, or loss of a bodily part, by the use of the therapeutic properties of exercise, light, heat, cold, water, electricity, ultrasonics, and massage. The physical therapist's task is to restore function and assist the patient in reaching his maximum performance so that he may return to normal life. A key member of the rehabilitative medicine team the physical therapist is being sought after more and more by hospitals and other health facilities.

EDUCATION

There are three types of educational programs available. These are:

1. four year degree program
2. certificate program for holders of a college degree, requiring an additional 12 to 18 months
3. two-year graduate program

LICENSURE OR REGISTRATION

Upon graduation from an approved school, graduates are eligible to take the state licensing examination which is required in forty-five states.

PSYCHOLOGY

THE CAREER

Psychology is the science of human behavior. As distinguished from psychiatry - which is a branch of medicine - psychology is a non-medical science. It is also distinguished from psychiatric social work. Psychology looks first at the individual and his reaction to circumstances - family, job, and so on. There are various psychological occupation including Clinical Psychologist, Counseling Psychologist, and Social Psychologist. Every practicing psychologist combines skill in giving and interpreting tests with all the other professional skill involved in interviewing, diagnosing, and providing constructive guidance.

EDUCATION

Pre-professional training requires a Bachelor's Degree from an accredited college with either a major in psychology or an all-round education including some general psychology courses. Professional training takes place on the master's degree level. For continuing advancement in the field of psychology four years of graduate training in psychology, including a doctor of philosophy (Ph.D.) degree, together with at least one year of internship to provide supervised clinical experience is needed.

LICENSURE OR REGISTRATION

Kentucky State Board of Psychological Examiners requires Masters level psychologist to be certified. This entails a written examination in the professional aspects of psychology.

RADIOLOGICAL HEALTH SPECIALTY

THE CAREER Radiological Health Specialists are responsible, in detail, for the promotion of safe and efficient use of radiation and radioactive materials. In addition, they are responsible for the protection of the health and safety of users of radiation, and the general public. Publicizing and assisting in enforcement of safety regulations and aid in the event of accidents involving radiation or radioactive materials are major existing functions. Research toward improved radiation safety is essential as is formal teaching of other radiation scientists and associated personnel.

EDUCATION To qualify for this health career, the prospective student must hold a bachelor's degree in Public Health, Biological Sciences, Chemistry, Physics, or Sanitary Engineering. Then he must obtain a Master of Science (2 years) in Radiological Health Specialty.

LICENSURE OR REGISTRATION A Radiological Health Specialist must be licensed by the Kentucky Department of Health for consultary work.

RADIOLOGIC TECHNOLOGY (ARRT)

THE CAREER

Formerly, Radiologic Technology was called X-Ray Technique but with the advent of medical uses of the atom it encompasses all types of radiant energy. Technologists work under the guidance of a radiologist (physician specializing in the use of X-Ray and radiant energy). There are three distinct careers in Radiologic Technology: (1) X-Ray Technologists perform X-Ray examinations on patients (2) Radiation Therapy technologists assist the radiologist in treatment of disease by exposing affected areas of the patient's body to prescribed doses of X-Ray (3) Nuclear medicine technologists assist the physician in administering the required dose of radioisotopes given to patients to diagnose and treat disease.

EDUCATION

Two years of post high school education in an approved school (junior college or hospital based) is the basic requirement for Radiologic Technology. X-Ray Technologists are qualified after this two year period while Radiation Therapy Technologists and Nuclear Medicine Technologists need an additional year's training.

LICENSURE OR REGISTRATION

To become certified the graduated student must pass the examination given by the American Registry of Radiologic Technologists and they are then eligible to use the initials ARRT (American Registry Radiologic Technology).

REHABILITATION COUNSELING

THE CAREER

The Rehabilitation Counselor serves as psychological, educational and vocational counselor to persons handicapped by virtue of a mental or physical impairment. His task is to help the disabled minimize their handicap by capitalizing on their other resources - aptitudes, skills, and interests. Experienced workers often divide their time between client counseling and broader community activities.

EDUCATION

The minimum requirement for a beginner's job is four years of college and a bachelor's degree, preferably in psychology or education. Specialized professional education for rehabilitation counseling starts after college with work leading toward a master's degree. Such programs require from one to one-half to two years of graduate-level study.

LICENSURE OR REGISTRATION

Certification by Kentucky State Department of Education

FURTHER INFORMATION MAY BE OBTAINED FROM

Health Careers In Kentucky

REHABILITATIVE THERAPIES

THE CAREER

Corrective Therapist - Corrective therapists, working under the supervision of physicians, evaluate strength, endurance, self-care ability, and other data as a means of gauging the patient's progress and recovery rate. Unlike the physical therapist, they do not employ physical agents (heat, light, water, and others) in treatment routines.

Manual Arts Therapy - Manual arts therapists help patients to their fullest mental and physical capacities, within limits of their abilities and disabilities. The purpose of these activities is to determine if the patient can perform a job in a real-life situation and to instill self-confidence.

Educational Therapist - Education therapists administer medical treatment through the use of educational activities that have vocational significance to the patient. The therapist utilizes academic courses, business equipment and methods, and group discussions, all of which are designed to improve the patient's mental and physical condition, and to aid him in his recovery.

Recreation Therapy - A career that works towards restoring patients to a more normal life. A recreational therapist plans and directs recreational activities that are particularly useful to their patients either to help in recovery from illness or in coping with a temporary or permanent disability.

EDUCATION

All of these rehabilitative therapies require a four year college degree with a major in one of these four areas.

LICENSURE OR REGISTRATION

Graduates of these programs are certified in their specialty by the Veteran's Administration for employment with V.A. At the present time, these careers are not certified by any group except the V.A. and employment is normally restricted to government service or as a teacher in physical education, industrial arts, or general education.

RESPIRATORY TECHNICIAN
(INHALATION THERAPY TECHNICIAN)

THE CAREER

Respiratory Technicians or Inhalation Therapy Technicians as they are normally called, administer oxygen and other inhalation agents to patients as prescribed by a physician. This person assembles and applies respiratory equipment, possesses a knowledge of chemistry and pharmacology of the drugs used, instructs patients concerning the nature of the treatment ordered for them and many other tasks related to inhalation procedures. Respiratory Technicians are also vital personnel in medical emergency teams.

EDUCATION

Education for Respiratory Technicians is set at two years of post high school work in either a hospital based school or an accredited college.

LICENSURE OR REGISTRATION

Inhalation Therapy is one of the newest health professions and also has one of the most difficult registration examinations. Graduates of approved schools may take the national certification examination of the American Registry of Inhalation Therapists which gives them official recognition by the American Medical Association.

SCHOOL HEALTH EDUCATOR

THE CAREER

School Health Educators are trained to prepare students to improve the health knowledge attitudes, and practices throughout their school years. They work closely with the physician and nurse serving the school, as well as with all other teachers and service personnel in the school. Occupying this position may also lead to this person becoming a school health coordinator working in more than one school.

EDUCATION

A bachelor's degree with a background in biological, physical, and social sciences and in health education is needed to enter this career. A master's degree is offered in preparation for Faculty of Allied Health Programs at the post-secondary level.

LICENSURE OR REGISTRATION

At the present time, only a state teachers certificate is needed.

SOCIAL WORK

THE CAREER

Social Workers are trained to understand people their problems and social needs. They must be familiar with all of the community resources which may be tapped to assist the infividual. The Social Worker in the medical field may assist patients and their families with personal problems that result from severe or long illness or disability.

EDUCATION

Until recently, it was believed that most social work jobs required the professional or master's degree worker. However, because there has been a limited number of these workers and because jobs differ in demands, many positions are, in fact, being filled by graduates of liberal arts colleges.

LICENSURE OR REGISTRATION

None

SPEECH PATHOLOGY AND AUDIOLOGY

THE CAREER Speech Pathologists and Audiologists are concerned with problems and disorders of human communication as manifested in the process of speech and hearing. Problems commonly handled are stuttering, lisping, cleft palates, cerebral palsy, and impaired hearing cases. The clinician usually works closely with psysicians, dentists, psychiatrists, psychologists, vocational counselors, nurses, social workers, and teachers. Speech pathologists and audiologists are readily employed in schools, public health departments, industry, various research agencies, and in governmental services.

EDUCATION Pre-professional training requires a Bachelor's degree from an accredited college with a major in Speech Pathology and Audiology. Professional training takes place on the master's degree level, making the total education requirement six years.

LICENSURE OR REGISTRATION A certificate of Clinical Competence may be obtained from the American Speech and Hearing Association when the graduate passes the national examination and meets other specific requirements.

SURGICAL TECHNICIAN

THE CAREER Surgical Technicians (sometimes called operating room technicians) work under the direct supervision of physicians and nurses in the hospital's operating room. Their duties vary from assisting with the passing of instruments in surgery to preparing the operating room with instruments and supplies or assisting with the post-operative care of the patient. Surgical Technicians are required to have a thorough knowledge of surgical asepsis.

EDUCATION Surgical Technicians should have a high school diploma before entering formal training. Normal training for surgical technicians is five and one half to six months in a hospital school. Applicants should take aptitude and manual dexterity tests given by the school.

LICENSURE OR REGISTRATION None

WARD CLERK

THE CAREER — Ward Clerks or secretaries act in a sense as a secretary to the nursing staff in a hospital. They relieve the nurse of much of the paper work involved in patient care. They deal with patients, physicians, patient's families, and almost all departments of the hospital. Ward Clerks also, in some instances, coordinate the travel of the patient from department to department as well as maintaining non-medical supplies on the nursing floor.

EDUCATION — Ward Clerks may be trained on the job or take a three to six months formally structured course.

LICENSURE OR REGISTRATION — None
